

FOR ADULTS WITH MODERATE TO SEVERE PLAQUE PSORIASIS AND FOR ADULTS WITH ACTIVE PSORIATIC ARTHRITIS

YOUR TREATMENT CONVERSATION

For your next doctor's appointment, use your responses below to keep your conversation on track and emphasize the points you want your doctor to address.

Looking for a way to get your conversation started?

Fill in the blanks to create your Goal Statement

"I've been on my current treatment for _____. Is it normal for me to be experiencing _____? I'd like to see results in _____."

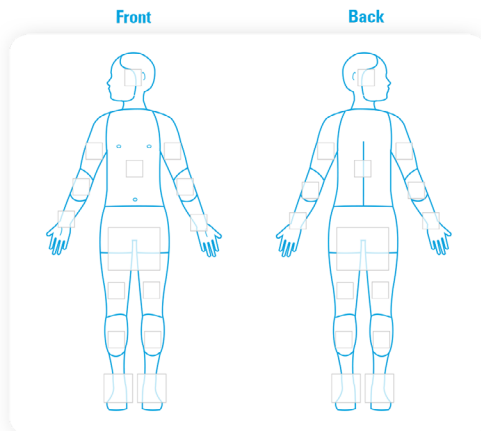

Could SKYRIZI help me achieve my treatment goals?

Keep the conversation going.

These are the symptoms I am currently experiencing:

- Thick, red, scaly skin plaques Swollen or stiff limbs
Red, inflamed lesions Joint pain

Currently this is where I'm experiencing symptoms:

SKYRIZI is not indicated to treat a specific location of the body for plaque psoriasis or psoriatic arthritis. Keep in mind, your handprint is about the same size as 1% of your skin's surface.

What percentage of your body is affected by psoriasis? 0-3% 3-9% 10% or more

If you are experiencing joint symptoms, how many swollen and/or tender joints do you have?

- 1 2 3 4 More than 4 N/A

In the past year, has there been a change in the intensity of your symptoms and where they appear?

- Yes No

USES

- SKYRIZI is a prescription medicine used to treat adults: with moderate to severe plaque psoriasis... with active psoriatic arthritis (PsA).

Questions for your doctor about location and severity:

What treatment strategies work for reducing plaques and/or joint pain?

What if my symptoms aren't getting better? Does that mean I should consider a different treatment?

Could SKYRIZI help me see a change in the severity of my symptoms?

If I'd like to see clearer skin, fewer plaques, and less joint symptoms, could SKYRIZI help me get there?

SAFETY CONSIDERATIONS

SKYRIZI may cause serious side effects, including:

- Serious allergic reactions: Stop using SKYRIZI and get emergency medical help... Infections: SKYRIZI may increase your risk of infections.

Do not use SKYRIZI if you are allergic to risankizumab-rzaa or any of the ingredients in SKYRIZI.

Also, tell your doctor if you plan to or recently received a vaccine

Please see additional Important Safety Information on page 3. Please see Full Prescribing Information, including Medication Guide, at www.rxabbvie.com/pdf/skyrizi_pi.pdf and discuss with your doctor.

Currently, I'm using the following to treat my symptoms (check all that apply):

- Over-the-counter drugs
- Phototherapy
- Diet and lifestyle changes
- Prescription topicals
- Oral treatment
- Biologic treatment
- Other treatment

Questions about other treatments:

I'm interested in other treatments. Would SKYRIZI® (risankizumab-rzaa) be an option for me?

What results can I expect with SKYRIZI? What is the dosing schedule for SKYRIZI?

I'm interested in exploring treatment options. With a treatment, I'm looking for the following (check all that apply):

- How well a treatment works
- How often I have to take it
- How long results last
- Something else

Questions about other treatments:

In clinical trials, how many patients achieved skin clearance on SKYRIZI? What are the benefits and risks of SKYRIZI?

In a typical week, I spend _____ treating my psoriasis.

- Less than 1 hour
- 1-3 hours
- 4-6 hours
- 7-9 hours
- More than 10 hours
- N/A

Questions about daily management:

Is there a treatment option with a different treatment regimen?

Could you go over the dosing schedule for SKYRIZI?

Here's what I'd like you to know about my life with my symptoms (check all that apply):

- I don't show as much skin as I'd like to
- I don't interact with others the way I'd like to
- I'm not as active as I'd like to be
- There's something specific I'd like to discuss

Questions about daily management:

What can I do to address this?

Here's how often I'm experiencing swollen or stiff limbs and joint pain symptoms:

- Daily
- Weekly
- Monthly
- N/A

USES

SKYRIZI is a prescription medicine used to treat adults:

- with moderate to severe plaque psoriasis who may benefit from taking injections or pills (systemic therapy) or treatment using ultraviolet or UV light (phototherapy).
- with active psoriatic arthritis (PsA).

SAFETY CONSIDERATIONS

SKYRIZI may cause serious side effects, including:

- **Serious allergic reactions:** Stop using SKYRIZI and get emergency medical help right away if you get any symptoms of a serious allergic reaction.
- **Infections:** SKYRIZI may increase your risk of infections. Before starting treatment, your doctor should check you for infections and tuberculosis. Tell your doctor right away if you have an infection or symptoms of one.

Do not use SKYRIZI if you are allergic to risankizumab-rzaa or any of the ingredients in SKYRIZI.

Also, tell your doctor if you plan to or recently received a vaccine.

Please see additional Important Safety Information on page 3. Please see Full Prescribing Information, including Medication Guide, at www.rxabbvie.com/pdf/skyrizi_pi.pdf and discuss with your doctor.

USES

SKYRIZI is a prescription medicine used to treat adults:

- with moderate to severe plaque psoriasis who may benefit from taking injections or pills (systemic therapy) or treatment using ultraviolet or UV light (phototherapy).
- with active psoriatic arthritis (PsA).

Important Safety Information

What is the most important information I should know about SKYRIZI® (risankizumab-rzaa)?

SKYRIZI is a prescription medicine that may cause serious side effects, including:

Serious allergic reactions:

- Stop using SKYRIZI and get emergency medical help right away if you get any of the following symptoms of a serious allergic reaction:
 - fainting, dizziness, feeling lightheaded (low blood pressure)
 - swelling of your face, eyelids, lips, mouth, tongue, or throat
 - trouble breathing or throat tightness
 - chest tightness
 - skin rash, hives
 - itching

Infections:

SKYRIZI may lower the ability of your immune system to fight infections and may increase your risk of infections. Your healthcare provider should check you for infections and tuberculosis (TB) before starting treatment with SKYRIZI and may treat you for TB before you begin treatment with SKYRIZI if you have a history of TB or have active TB. Your healthcare provider should watch you closely for signs and symptoms of TB during and after treatment with SKYRIZI.

- Tell your healthcare provider right away if you have an infection or have symptoms of an infection, including:
 - fever, sweats, or chills
 - cough
 - shortness of breath
 - blood in your mucus (phlegm)
 - muscle aches
 - warm, red, or painful skin or sores on your body different from your psoriasis
 - weight loss
 - diarrhea or stomach pain
 - burning when you urinate or urinating more often than normal

Do not use SKYRIZI if you are allergic to risankizumab-rzaa or any of the ingredients in SKYRIZI.

Before using SKYRIZI, tell your healthcare provider about all of your medical conditions, including if you:

- have any of the conditions or symptoms listed in the section “What is the most important information I should know about SKYRIZI?”
- have an infection that does not go away or that keeps coming back.
- have TB or have been in close contact with someone with TB.
- have recently received or are scheduled to receive an immunization (vaccine). Medications that interact with the immune system may increase your risk of getting an infection after receiving live vaccines. You should avoid receiving live vaccines right before, during, or right after treatment with SKYRIZI. Tell your healthcare provider that you are taking SKYRIZI before receiving a vaccine.
- are pregnant or plan to become pregnant. It is not known if SKYRIZI can harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if SKYRIZI passes into your breast milk.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the possible side effects of SKYRIZI?

SKYRIZI may cause serious side effects. See “What is the most important information I should know about SKYRIZI?”

The most common side effects of SKYRIZI include upper respiratory infections, feeling tired, fungal skin infections, headache, and injection site reactions.

These are not all the possible side effects of SKYRIZI. Call your doctor for medical advice about side effects.

Use SKYRIZI exactly as your healthcare provider tells you to use it.

SKYRIZI is available in a 150 mg/mL prefilled syringe and pen.
