

SKYRIZI ON-BODY INJECTOR

You're ready to take the next step in your treatment.

Skyrizi[®] COMPLETE

Use this guide to help you understand the injection process so you can start and stay on track with your prescribed treatment plan.

PREPARE FOR SKYRIZI TREATMENT WITH THE ON-BODY INJECTOR (OBI)

Your first OBI injection will be **4 weeks** after your third infusion. Your healthcare provider should show you how to properly inject before you inject on your own. You'll then inject **every 8 weeks** as prescribed by your doctor, either at home or at your doctor's office.

- ☐ Write down the dates of your first 3 injections to help plan your new routine.

INJECTION 1

(Date/time): ____/____/____ : ____ ☐ AM ☐ PM

INJECTION 2

(Date/time): ____/____/____ : ____ ☐ AM ☐ PM

INJECTION 3

(Date/time): ____/____/____ : ____ ☐ AM ☐ PM

- ☐ Confirm with your doctor's office which specialty pharmacy will fill your prescription.
Record the name, location, and phone number below.

SPECIALTY PHARMACY Name/location: _____

Phone number: () - _____

- ☐ Call your specialty pharmacy 2 weeks before each injection.
- Give your specialty pharmacy the Rx numbers on your Skyrizi Complete Savings Card* first.
If there is a remaining balance, you will be contacted by your specialty pharmacy for additional card information.
 - Confirm where your SKYRIZI will be delivered.

Need a Savings Card?

If you are an eligible, commercially insured patient, you may be able to save on out-of-pocket costs for the OBI. Ask your Skyrizi Complete Nurse Ambassador[†] for a Savings Card if you don't yet have one. Call **1.866.SKYRIZI** (1.866.759.7494).[‡]

*For eligible, commercially insured patients only. See [Terms and Conditions](#).

[†]Nurse Ambassadors are provided by AbbVie and do not work under the direction of your healthcare professional (HCP) or give medical advice. They are trained to direct patients to their HCP for treatment-related advice, including further referrals.

[‡]Help is available Monday through Friday, from 8:00 AM to 8:00 PM ET, except for holidays.

Please see [Uses and Important Safety Information](#) on page 4.

Please see full Prescribing Information, including Medication Guide, at www.rxabbvie.com/pdf/skyrizi_pi.pdf and discuss with your doctor.

SKYRIZI ON-BODY INJECTOR

You're ready to take the next step in your treatment.

Skyrizi[®] COMPLETE

YOUR SKYRIZI MAY COST AS LITTLE AS \$0* PER TREATMENT

Paying for medicine shouldn't get in the way of your treatment. That's why Skyrizi Complete is here to help you save. No matter what kind of insurance you have, or even if you don't have insurance, savings may be available for your SKYRIZI.

Skyrizi Complete Savings Card

The Savings Card may help eligible, commercially insured patients lower out-of-pocket costs for SKYRIZI **to as little as \$0 per treatment**, including related costs for SKYRIZI infusions and the OBI.

Sign up today at Skyrizi.com/signup.

Skyrizi Complete Rebates*

Submit Complete Rebate reimbursement claims if you have an infusion bill or have already paid out of pocket for SKYRIZI infusions, infusion administration, the OBI, or lab tests.

Find out more at SkyriziComplete.com/rebate.

Other savings options may be available

Your Nurse Ambassador can provide expertise that can provide support as you start and stay on track with your prescribed SKYRIZI treatment.

They are here to:

- Find potential savings on your SKYRIZI treatment
- Navigate your health insurance coverage
- Answer questions and prepare you to move forward

Reach out for 1-to-1 support throughout your treatment. Call **1.866.SKYRIZI** (1.866.759.7494).[†]

*For eligible, commercially insured patients only. See Terms and Conditions below.

[†]Help is available Monday through Friday, from 8:00 AM to 8:00 PM ET, except for holidays.

Skyrizi Complete Savings Card Terms & Conditions

Eligibility: Available to patients with commercial insurance coverage for SKYRIZI[®] (risankizumab-rzaa) who meet eligibility criteria. This co-pay assistance program is not available to patients receiving prescription reimbursement under any federal, state, or government-funded insurance programs (for example, Medicare [including Part D], Medicare Advantage, Medigap, Medicaid, TRICARE, Department of Defense, or Veterans Affairs programs) or where prohibited by law. Offer subject to change or termination without notice. Restrictions, including monthly maximums, may apply. This is not health insurance. For full Terms and Conditions, visit www.skyrizi.com/savings-card-terms or call **1.866.SKYRIZI** for additional information. Skyrizi[®]
risankizumab-rzaa

USES AND IMPORTANT SAFETY INFORMATION ABOUT SKYRIZI® (risankizumab-rzaa)¹

SKYRIZI USES¹

SKYRIZI is a prescription medicine used to treat adults with:

- moderate to severe Crohn's disease.
- moderate to severe ulcerative colitis.

IMPORTANT SAFETY INFORMATION¹

What is the most important information I should know about SKYRIZI® (risankizumab-rzaa)?

SKYRIZI is a prescription medicine that may cause serious side effects, including:

Serious allergic reactions:

- Stop using SKYRIZI and get emergency medical help right away if you get any of the following symptoms of a serious allergic reaction:
 - fainting, dizziness, feeling lightheaded (low blood pressure)
 - swelling of your face, eyelids, lips, mouth, tongue, or throat
 - trouble breathing or throat tightness
 - chest tightness
 - skin rash, hives
 - itching

Infections:

SKYRIZI may lower the ability of your immune system to fight infections and may increase your risk of infections. Your healthcare provider should check you for infections and tuberculosis (TB) before starting treatment with SKYRIZI and may treat you for TB before you begin treatment with SKYRIZI if you have a history of TB or have active TB. Your healthcare provider should watch you closely for signs and symptoms of TB during and after treatment with SKYRIZI.

- Tell your healthcare provider right away if you have an infection or have symptoms of an infection, including:
 - fever, sweats, or chills
 - cough
 - shortness of breath
 - blood in your mucus (phlegm)
 - muscle aches
 - warm, red, or painful skin or sores on your body different from your psoriasis
 - weight loss
 - diarrhea or stomach pain
 - burning when you urinate or urinating more often than normal

Do not use SKYRIZI if you are allergic to risankizumab-rzaa or any of the ingredients in SKYRIZI. See the Medication Guide or Consumer Brief Summary for a complete list of ingredients.

Before using SKYRIZI, tell your healthcare provider about all of your medical conditions, including if you:

- have any of the conditions or symptoms listed in the section “What is the most important information I should know about SKYRIZI?”
- have an infection that does not go away or that keeps coming back.
- have TB or have been in close contact with someone with TB.

- have recently received or are scheduled to receive an immunization (vaccine). Medicines that interact with the immune system may increase your risk of getting an infection after receiving live vaccines. You should avoid receiving live vaccines right before, during, or right after treatment with SKYRIZI. Tell your healthcare provider that you are taking SKYRIZI before receiving a vaccine.
- are pregnant or plan to become pregnant. It is not known if SKYRIZI can harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if SKYRIZI passes into your breast milk.
- become pregnant while taking SKYRIZI. You are encouraged to enroll in the Pregnancy Registry, which is used to collect information about the health of you and your baby. Talk to your healthcare provider or call 1-877-302-2161 to enroll in this registry.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the possible side effects of SKYRIZI?

SKYRIZI may cause serious side effects. See “What is the most important information I should know about SKYRIZI?”

Liver problems may happen while being treated for Crohn's disease or ulcerative colitis: A person with Crohn's disease who received SKYRIZI through a vein in the arm developed changes in liver blood tests with a rash that led to hospitalization. Your healthcare provider will do blood tests to check your liver before, during, and at least up to 12 weeks of treatment, and may stop treatment with SKYRIZI if you develop liver problems. Tell your healthcare provider right away if you notice any of the following symptoms: unexplained rash, nausea, vomiting, stomach (abdominal) pain, tiredness (fatigue), loss of appetite, yellowing of the skin and eyes (jaundice), and dark urine.

The most common side effects of SKYRIZI in people treated for Crohn's disease and ulcerative colitis include: upper respiratory infections, headache, joint pain, stomach (abdominal) pain, injection site reactions, low red blood cells (anemia), fever, back pain, urinary tract infection, and rash.

These are not all the possible side effects of SKYRIZI. Call your doctor for medical advice about side effects.

Use SKYRIZI exactly as your healthcare provider tells you to use it.

SKYRIZI (risankizumab-rzaa) is available in a 600 mg/10 mL vial for intravenous infusion and a 180 mg/1.2 mL or 360 mg/2.4 mL single-dose prefilled cartridge with on-body injector.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

If you are having difficulty paying for your medicine, AbbVie may be able to help. Visit AbbVie.com/PatientAccessSupport to learn more.
