YOUR DOCTOR DISCUSSION TOOL

Your dermatologist knows how to treat adults with moderate to severe plaque psoriasis, but they may need more information to better design your treatment plan for you.

Before your appointment, fill out the questions below and bring them along. Share them with your dermatologist to help them determine if SKYRIZI could be right for you.

1. Am I satisfied with my current level of skin clearance? Currently, I have plaques on my:

- [ ] Face
- [ ] Arms
- [ ] Chest
- [ ] Back
- [ ] Legs
- [ ] Other

2. How do I currently treat my plaque psoriasis?

- [ ] Over-the-counter drugs
- [ ] Phototherapy
- [ ] Diet and lifestyle changes
- [ ] Prescription topicals
- [ ] Oral treatment
- [ ] Other treatments

3. In a typical week, how much time do I spend treating my psoriasis?

- [ ] Less than 1 hour
- [ ] 1–3 hours
- [ ] 4–6 hours
- [ ] 7–9 hours
- [ ] 10 or more hours

4. What am I looking for in a treatment option?

- [ ] How well my treatment works
- [ ] How often I have to treat
- [ ] How long my results last
- [ ] Something else

5. How has plaque psoriasis impacted how I live my life?

- [ ] I don’t show as much skin as I would like to
- [ ] I don’t interact with others the way I’d like to
- [ ] I don’t do some things that I’d like to
- [ ] Other ways

USE

SKYRIZI is a prescription medicine used to treat adults with moderate to severe plaque psoriasis who may benefit from taking injections or pills (systemic therapy) or treatment using ultraviolet or UV light (phototherapy).

SAFETY CONSIDERATIONS

SKYRIZI may cause serious side effects, including risk of infections. Before starting treatment, your doctor should check you for infections and tuberculosis. Tell your doctor right away if you have an infection or symptoms of one. Also, tell your doctor if you plan to or recently received a vaccine.

Please see additional Important Safety Information on next page.

Please visit https://www.rxabbvie.com/pdf/skyrizi_pi.pdf for Full Prescribing Information, including the Medication Guide, and discuss with your doctor.
IMPORTANT SAFETY INFORMATION

What is the most important information I should know about SKYRIZI™ (risankizumab-rzaa)?
SKYRIZI may cause serious side effects, including infections. SKYRIZI is a prescription medicine that may lower the ability of your immune system to fight infections and may increase your risk of infections. Your healthcare provider should check you for infections and tuberculosis (TB) before starting treatment with SKYRIZI and may treat you for TB before you begin treatment with SKYRIZI if you have a history of TB or have active TB. Your healthcare provider should watch you closely for signs and symptoms of TB during and after treatment with SKYRIZI.

Tell your healthcare provider right away if you have an infection or have symptoms of an infection, including:
- fever, sweats, or chills
- muscle aches
- weight loss
- cough
- warm, red, or painful skin or sores on your body different from your psoriasis
- diarrhea or stomach pain
- shortness of breath
- blood in your mucus (phlegm)
- burning when you urinate or urinating more often than normal

Before using SKYRIZI, tell your healthcare provider about all of your medical conditions, including if you:
- have any of the conditions or symptoms listed in the section “What is the most important information I should know about SKYRIZI?”
- have an infection that does not go away or that keeps coming back.
- have TB or have been in close contact with someone with TB.
- have recently received or are scheduled to receive an immunization (vaccine). You should avoid receiving live vaccines during treatment with SKYRIZI.
- are pregnant or plan to become pregnant. It is not known if SKYRIZI can harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if SKYRIZI passes into your breast milk.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the possible side effects of SKYRIZI?
SKYRIZI may cause serious side effects. See “What is the most important information I should know about SKYRIZI?”

The most common side effects of SKYRIZI include upper respiratory infections, fungal skin infections, headache, feeling tired, and injection site reactions.

These are not all the possible side effects of SKYRIZI. Call your doctor for medical advice about side effects.

Use SKYRIZI exactly as your healthcare provider tells you to use it.

Please see the Full Prescribing Information, including the Medication Guide, for SKYRIZI.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call 1-800-FDA-1088.

If you are having difficulty paying for your medicine, AbbVie may be able to help. Visit AbbVie.com/myAbbVieAssist to learn more.
