

FROM PRESCRIPTION TO TREATMENT IN 4 STEPS

Once you start SKYRIZI, you're a key player throughout the treatment process. These steps will help you understand the important role you play.

STEP 1: Talk to Your Doctor

SKYRIZI may require a prior authorization (PA) from your health insurance company. Your doctor might need additional medical information for the PA before you can start your SKYRIZI treatment.

What you can do:

- Confirm that your doctor has the information they need for your PA request

STEP 2: Verify Coverage

Your doctor will verify your benefits coverage with your health insurance company before the PA request is submitted.

What you can do:

- Keep notes on any conversations you have with your doctor or your health insurance company
- Since PA approval may be required before you can begin treatment, follow up with your provider, insurance company, or pharmacy benefits manager on the status of the PA request

STEP 3: Work With Your Specialty Pharmacy

Specialty pharmacies manage the handling and delivery of specialty medicines like SKYRIZI. Once your specialty pharmacy receives your prescription and verifies your coverage, they will call you to confirm delivery and payment details.

What you can do:

- Ask your doctor for the contact information of your specialty pharmacy
- If you don't hear from your specialty pharmacy, call them to confirm your address and the delivery date for your SKYRIZI
- Keep SKYRIZI refrigerated until use if delivered to your home or verify its arrival at your doctor's office in advance
- When it's time to pay for your SKYRIZI, use your Skeyrizi Complete Savings Card to pay as little as \$0 per dose,* if eligible. Questions? Call your Nurse Ambassador[†] at **1.866.SKYZRIZI** (1.866.759.7494)

STEP 4: Start Your SKYRIZI Treatment

On your scheduled treatment day, go to your doctor's office to receive your injection or inject at home.

What you can do:

- Have your doctor show you how to properly inject before you start injecting on your own
- Mark down the date of your next injection on your calendar, or use the Skeyrizi Complete App to keep track of your injections

Visit **SKYZRIZI injection support** for more information and resources about injecting.

For any questions about preparing for your upcoming injection, call your Skeyrizi Complete Nurse Ambassador at **1.866.SKYZRIZI** (1.866.759.7494).

*For eligible, commercially insured patients. Please see Terms and Conditions on the last page.

[†]Nurse Ambassadors are provided by AbbVie and do not work under the direction of your health care professional (HCP) or give medical advice. They are trained to direct patients to their HCP for treatment-related advice, including further referrals.

IMPORTANT SAFETY INFORMATION

ABOUT SKYRIZI® (risankizumab-rzaa)

SKYRIZI USES

SKYRIZI is a prescription medicine used to treat adults:

- with moderate to severe plaque psoriasis who may benefit from taking injections or pills (systemic therapy) or treatment using ultraviolet or UV light (phototherapy).
- with active psoriatic arthritis (PsA).

IMPORTANT SAFETY INFORMATION

What is the most important information I should know about SKYRIZI® (risankizumab-rzaa)?

SKYRIZI is a prescription medicine that may cause serious side effects, including:

Serious allergic reactions:

- Stop using SKYRIZI and get emergency medical help right away if you get any of the following symptoms of a serious allergic reaction:
 - fainting, dizziness, feeling lightheaded (low blood pressure)
 - swelling of your face, eyelids, lips, mouth, tongue, or throat
 - trouble breathing or throat tightness
 - chest tightness
 - skin rash, hives
 - itching

Infections:

SKYRIZI may lower the ability of your immune system to fight infections and may increase your risk of infections. Your healthcare provider should check you for infections and tuberculosis (TB) before starting treatment with SKYRIZI and may treat you for TB before you begin treatment with SKYRIZI if you have a history of TB or have active TB. Your healthcare provider should watch you closely for signs and symptoms of TB during and after treatment with SKYRIZI.

- Tell your healthcare provider right away if you have an infection or have symptoms of an infection, including:
 - fever, sweats, or chills
 - cough
 - shortness of breath
 - blood in your mucus (phlegm)
 - muscle aches
 - warm, red, or painful skin or sores on your body different from your psoriasis
 - weight loss
 - diarrhea or stomach pain
 - burning when you urinate or urinating more often than normal

Do not use SKYRIZI if you are allergic to risankizumab-rzaa or any of the ingredients in SKYRIZI. See the Medication Guide or Consumer Brief Summary for a complete list of ingredients.

Before using SKYRIZI, tell your healthcare provider about all of your medical conditions, including if you:

- have any of the conditions or symptoms listed in the section **“What is the most important information I should know about SKYRIZI?”**
- have an infection that does not go away or that keeps coming back.
- have TB or have been in close contact with someone with TB.
- have recently received or are scheduled to receive an immunization (vaccine). Medications that interact with the immune system may increase your risk of getting an infection after receiving live vaccines. You should avoid receiving live vaccines right before, during, or right after treatment with SKYRIZI. Tell your healthcare provider that you are taking SKYRIZI before receiving a vaccine.
- are pregnant or plan to become pregnant. It is not known if SKYRIZI can harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if SKYRIZI passes into your breast milk.
- become pregnant while taking SKYRIZI. You are encouraged to enroll in the Pregnancy Registry, which is used to collect information about the health of you and your baby. Talk to your healthcare provider or call 1-877-302-2161 to enroll in this registry.

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

What are the possible side effects of SKYRIZI?

SKYRIZI may cause serious side effects. See “What is the most important information I should know about SKYRIZI?”

The most common side effects of SKYRIZI in people treated for plaque psoriasis and psoriatic arthritis include: upper respiratory infections, headache, feeling tired, injection site reactions, and fungal skin infections.

These are not all the possible side effects of SKYRIZI. Call your doctor for medical advice about side effects.

Use SKYRIZI exactly as your healthcare provider tells you to use it.

SKYRIZI is available in a 150 mg/mL prefilled syringe and pen.

You are encouraged to report negative side effects of prescription drugs to the FDA. Visit www.fda.gov/medwatch or call **1-800-FDA-1088.**

If you are having difficulty paying for your medicine, AbbVie may be able to help. Visit AbbVie.com/PatientAccessSupport to learn more.

Eligibility: Available to patients with commercial insurance coverage for SKYRIZI who meet eligibility criteria. This co-pay assistance program is not available to patients receiving prescription reimbursement under any federal, state, or government-funded insurance programs (for example, Medicare [including Part D], Medicare Advantage, Medigap, Medicaid, TRICARE, Department of Defense, or Veterans Affairs programs) or where prohibited by law. Offer subject to change or termination without notice. Restrictions, including monthly maximums, may apply. This is not health insurance. **For full Terms and Conditions, visit SKYRIZISavingsCard.com or call **1.866.SKYRIZI** for additional information. To learn about AbbVie’s privacy practices and your privacy choices, visit <https://abbvie.com/corpprivacy>.**
